
PhD Thesis 2017-18

PhD in Organic Chemistry

Universitat de Barcelona

1. Alejandro Gil Escolano

Studies toward the synthesis of marine natural products Phormidolides B-D

Supervised by Dr. Fernando Albericio (UB) and Dr. Mercedes Alvarez (UB)

16/02/2018 16:00 h

2. Helena Martín Gómez

Development of synthetic strategies for lasso peptides with anticancer activity

Supervised by Dr. Judit Tulla (UB) and Dr. Antoni Riera (UB)

23/02/2018 15:30 h

3. Martí Ninot Pedrosa

Towards the validation of a druggable amyloid- β oligomer as a target for Alzheimer's disease

Supervised by Dr. Natàlia Carulla (IRB)

02/03/2018 10:00 h

4. Miguel Arbesú Andrés

A novel regulatory unit in the N-Terminal region of c-Src

Supervised by Dr. Miquel Pons (UB)

02/03/2018 16:30 h

5. *Cristina Díaz Perlas*

From phage display and venoms to protease-resistant peptides: Design of BBB-shuttles and peptides targeting EGF

Supervised by Dr. Ernest Giralt (UB) and Dr. Meritxell Teixidó (IRB)

07/03/2018 11:00 h
